

Product Requirement Document

Product Name

Smart Wishlist for E-Commerce Platform

Background

Customers frequently discover products they are interested in but are not ready to purchase immediately.

Currently, customers must either purchase products immediately or manually search for them later.

This results in lower customer engagement and reduced conversion rates.

The platform requires a Wishlist feature that allows customers to save products for future purchase.

Business Goal

Increase customer engagement and repeat visits.

Increase conversion rate from saved products.

Improve customer retention.

Success Metrics

- 30% of registered users create at least one wishlist
 - 15% increase in repeat visits
 - 10% increase in purchases originating from wishlist items
-

User Personas

Shopper

A registered customer who wants to save products for later purchase.

Returning Customer

A customer who regularly compares products before purchasing.

Mobile User

A customer primarily accessing the platform through mobile devices.

Feature Overview

Customers should be able to:

- Add products to wishlist
 - Remove products from wishlist
 - View wishlist
 - Move wishlist items to cart
 - Receive notifications when wishlist items go on sale
 - Access wishlist across devices
-

Functional Requirements

FR-1 Add Product To Wishlist

Given a logged-in user is viewing a product

When the user clicks "Add to Wishlist"

Then the product should be added to the user's wishlist

And a success message should be displayed

FR-2 Remove Product From Wishlist

Given a product exists in the user's wishlist

When the user clicks "Remove"

Then the product should be removed

And the wishlist count should update

FR-3 View Wishlist

Given a logged-in user

When the user navigates to Wishlist

Then all saved items should be displayed

Including:

- Product Name
 - Product Price
 - Product Image
 - Stock Status
-

FR-4 Move Item To Cart

Given a product exists in the wishlist

When the user selects "Move To Cart"

Then the product should be added to the shopping cart

And removed from wishlist

FR-5 Sale Notification

Given a product exists in the wishlist

When the product price decreases

Then a notification should be sent to the user

FR-6 Multi-Device Synchronization

Given a user accesses the platform from multiple devices

When the wishlist is updated on one device

Then the update should be visible on all devices within 30 seconds

Non Functional Requirements

Performance

Wishlist page should load within 2 seconds.

Availability

Wishlist service should maintain 99.9% uptime.

Security

Only authenticated users can access their wishlist.

Users must not be able to access another user's wishlist.

Accessibility

Wishlist pages must support keyboard navigation and screen readers.

Assumptions

Users must have registered accounts.

Users must be logged in.

Products must exist in inventory.

Out Of Scope

Sharing wishlist with other users.

Public wishlists.

Social media integrations.

Demo Scenarios

1. Add product to wishlist
 2. View wishlist
 3. Remove product from wishlist
 4. Move item from wishlist to cart
 5. Verify multi-device synchronization
 6. Verify sale notification workflow
-

Risks

- Inventory synchronization delays
- Notification delivery failures
- Session synchronization issues across devices
